<Beni Jaichenco/>

- Fullstack Developer
- Web Designer

Summary:

I create dynamic and user-friendly websites & apps, with hands-on experience in a fast-paced startup environment, software engineering in the IDF, and independent projects.

Experience:

[2024] Startup | Freelance Fullstack Developer

Building a feature-rich app in React Native and TypeScript with cross-platform performance.

[2024] IDF | Software Engineer

Developed automation software using NodeJS based on personnel preferences from large datasets.

Education:

[2023 - 2025] iNT College | Fullstack Development

564-hour course focusing on both front-end and back-end technologies. The program emphasized hands-on learning through real-world projects, developing expertise in client-side and server-side programming, and resulting in an industry-level final project.

Skills:

[JavaScript, TypeScript, React, React Native, NodeJS, Express, MongoDB, Redis, MySQL, PostgreSQL, Jest, Docker, HTML, CSS, SCSS]
